Quarantine Accounts.

There would appear to be a very distaut hope that the various accounts due by the Board of Health of this city, incurred during the late visitation of smallpox, being paid for some time to come at least. When the steamship Prince Alfred arrived at this port in the early part of June last and reported a case of small-per on board, the announcement not only took every one by surprise, but it found the local Board of Health quite unprepared to deal with so unlooked-for a visitation of that dreaded malady-The daty, however, of grappling with the difficulty having been forced upon the Board, they set themselves to work and adopted such measures as in their judgment were necessary to arrest the spread of the disease. They removed the sick to a safe locality, placed the passengers of the ship in quarantine on shore, and ordered the steamer and crew into quarantine in the outer barbor, and there all were kept until the medical officer of the port gave his certificate that the ship. crew, and passengers so held in quarantine might be discharged without endangering the public health. In view of the exigency of the case and the baste with which every thing had to be done, it is not so very surprising that the lia-bilities incurred should appear somewhat out of proportion to the number of cases of the disease with which the Board had to deal on the occasion referred to. The total amount of liabilities incurred exceed twelve thousand dollars, and the local Government have now in their poson goods so the value of about eight hundred dollars as a set-off against that amount. The prevailing opinion is that Two first class 2 in. Lumber Wagons, the charges made for services rendered One second hand Lumber Wagon, under the direction of the Board of Health are excessive, and we quite con- Three New Buggies, cur in that opinion. That, however, is a matter quite susceptible of amendment— One Prize Plough, the Board are under no obligation to pay more than a just compensation for any service performed. The difficulty does not consist in the amount of liabilities not consist in the amount of liabilities Three Sets Blecksmith's Tools, incurred, but in who are to liquidate One Tire Shrinker and two Tire Rollers, those accounts. Upon whom rests the responsibility? The Board of Health say the local Government; the local Government say the Dominion Government; and Mr. Tims, who represents the Dominion Government here, says the Municipal Council. The result of this diversity of opinion and desire to escape responsibility is, that many poor men who have been in the employ of the Board of Health, and have just claims against that body, are kept out of their money, and no one can tell when they are likely to be paid or who will pay them. The Board of Health, we believe, contend that they acted in this matter simply as the servants of the local Government Every step they took and every act they performed was by the advice and under the direction of the Provincial Secretary and Attorney General. The disease did not originate within the corporate limits of Victoria, but was brought here from a foreign port, and they therefore contend that the liabilities and costs, whatever they may be, should not be held to be chargeable against the city revenue, but should be borne by the local Government. If it be true that the Dominion Government, by virtue of the British North America Act and the terms of union agreed upon between the representatives of this Province and those of the Dominion, has agreed to pay liabilities incurred on quarantine account, then it will be the duty of our Government, after having liquidated those claims, to make applicato be reimbursed in the amount so paid, and no doubt they will pay it. But for the Provincial Government to seek to shirk the matter, by referring it to Mr, Time and notifying the Board of Health that they must look to that gentleman, as the Demission agent, for a settlement of the accounts in question, is anything but commendable. It is a question to be settled between the two Governments, and Mr. Time, we think, very properly declined to recognize the Board of Health at all in the transaction. Had the case arisen in the city, the expenses attending it would fairly and properly have fallen upon the city revenue; but as it was brought here on board a sea-going vessel, and as in point of fact neither the persons sick nor the passengers quaran timed ever entered the city at all until all danger was declared to be at an end, it seems to us that if the Provincial Government had taken the subject in band, audited the accounts or referred them back to the Beard for audit, and then paid them, they would have had a good claim against the Dominion Government for a reimbursement of whatever sum they hed paid on quarantine account. It is at reas true, the local Health Ordinance may be silled.

the tax-payers of Victoria city, but to do so would, in our estimation, be an act of grees injustice. PROVINCIAL SECRETARY'S OFFICE. October, 9th, 1872. THE LIEUTENANT GOVERNOR directs dressed to the Provincial Government, by T.

A. Bulkley, Eq., Chief Engineer, upon the comparative advantages offered by "Leng Cove" and "Thetis Cove." as alternative sites for the proposed graving Dock at Esqui-malt, to be published for the information of the public generally.

By Command.

A. ROCKE ROBERTSON,

"In originally selecting Thetis Cove, I was entirely unbiassed. I was aware that "Constance (or more accurately "Lang") Cove had been mentioned, though I did not know it had been so strongly recommended as I have since ascertained was the case. And I still hold to my opinion as to "Thetis Cove" being run Site, as regards economy and facility of construction, and as being more sheltered and, consequently, easier of access.

Being anxious, however, to place before Government semething more than my aware a suggest on of His Excellency the Governor, I beg to submit a comparative statement of the cost of Dock in alternative site.

Now, although the cost of actual construc-tion of the Graving Dock itself may be assumed as the same in either place, there are DESCRIPTION OF SPARROWHAWK everal variable items in connection with the work which will considerably affect the total

Among these the following are the most mportant Vis:- 1. "Cofferdam," or the cost of exclude Waters during construction.

2. "Excavation for foundations."

3. "Purchase of necessary Land."

Wherever the Dock is located, in order to

make it complete, it will be necessary to fill in round the sides and back, to, at least, 3 feet above high water. We have, therefore, 4. "Reclamation round Dock."
Arranged in the shaped of a Debtor and

be as follows:

From the tone of the Opposition journals in Ontario, it is evident that the tentica which they have hitherte pursued are is an any changed. Misrepresentation is still to they have hitherte pursued are is so may changed. Misrepresentation is still to form their most powerful agent and wenpon of attack, and determined efforts are being and was buried on Sunday. There are now no cases amongst the Indians, and no new cases in the part, and its probable effects upon the future destintes to the country. The election by a colamation of Sir George Cartier for Provenuer, one of the election of Manitoba, has furnished a spicy morsel for the pen of the Opposition press, which event the pen of the Opposition press, which event the pen of the Opposition press, which event the match between the artillery and the rife corps, on Saturday, the artillery capturing to out the Nathan election. the pen of the Opposition press, which event so far even as to say "picture a Minister of War of the Deminion on his knees to Riel making terms before he can be permitted to secure a seat for himself in the Commons."
